

## PAYOUTS

RocketFuel helps businesses pay freelancers, vendors, creators and employees in crypto.

RocketFuel's payouts fit seamlessly with any merchant's existing integration.

Merchants' funds remain in fiat while RocketFuel converts them to crypto and executes the payments. When a business sends its payouts, RocketFuel enables the payment to the deposit addresses faster and safer.

Payouts are a fantastic way for businesses that handle several payments in many different geographies. Payouts are recorded on the blockchain creating transparency and efficiency.

Merchants have access to a rich-feature data transaction dashboard.

### High-Risk

Prime for any business in high-risk payment spaces.

### Extended Reach

Perfect for merchants and Payment Service Providers (PSPs) that execute a large number of payouts in several countries.

### Non-Custodial

RocketFuel doesn't hold clients' funds. We are neither an exchange nor a wallet.

### Low Fees

No more high administrative fees.

### Blockchain-Powered

Secure & transparent.

### Fast Settlements

Automated, non-centralized fast payments.

### Rich-Feature Dashboard

Merchants have access to all data transactions in one single place. Shared pay in login.

### Bitcoin & 160+ Cryptocurrencies

Payees choose from an array of crypto.

### Flexibility

Easy Scalability: no limit on the number of deposit addresses.
